

SPORTENG™

Multi Use of Sports Grounds - by Governance and Design **WEBINAR**

As the pressure on public open space continues to grow, how can local governments best plan for effective multi-sport use of sports grounds?

Who is this webinar for:

- Local, state and territory government sport and recreation officers
- Council property teams
- Community leasing teams
- State and national level sports peak body representatives
- Sports facility planners
- Shared sports ground users

Combining the expertise of **CPR Group** and **SportEng**, this webinar will help address common pain points for facility managers and users of multi sport venues.

Register now to secure your spot!

The need to develop sports grounds to accommodate multiple sports is becoming more urgent, particularly in densely-populated or fast-growing communities.

Yet it seems that many Councils are still to find the best way to design and operate multi use sports grounds to provide successful outcomes for their communities.

Join **SportEng**, leaders in sport facility engineering and design, and **CPR Group**, experts in sports governance and community development, for an informative webinar on the **importance of multi use sports facilities** and practical steps to help make them work in real life.

In this webinar, we will cover the principles of **facility design, engineering, development, operation** and **management** necessary for sports grounds to be able to accommodate **intensive usage for multiple activities**. This will include surface types, irrigation, lighting and use rotation, as well as the best management and governance structures to support multiple user groups and how Councils should structure their tenure agreements.

Wednesday **27 April 2022**
9:30am - 10:30am (AEST)
